

Bonjour,

For the pleasure of the nose, senses and well-being, I can create with you your custom natural fragrance. **Til the end of June, for any new creation or order of your perfume, I can offer you a handmade perfume bottle.**

*All perfumes are created in taking into account the allergens of plants and in accordance to the European and International safety standards.  
(Various companies in Switzerland use my services for controlling the rate of allergens in their products or composing new fragrances).*

If you can not come in my little workshop, **with my two suitcases** filled with jars, I can now come to you and create your perfume.

**If you have a beauty salon or spa** and would like to offer something original to your customers, feel free to contact me. We can also create your own skincare line.

**The new dates of courses and seminars** will be sent later. Thank you for your patience.

For more information, you can click on the link:

Hope to hear from you and I wish you some beautiful days.

Jacques Masraff / [www.evanescence.ch](http://www.evanescence.ch)

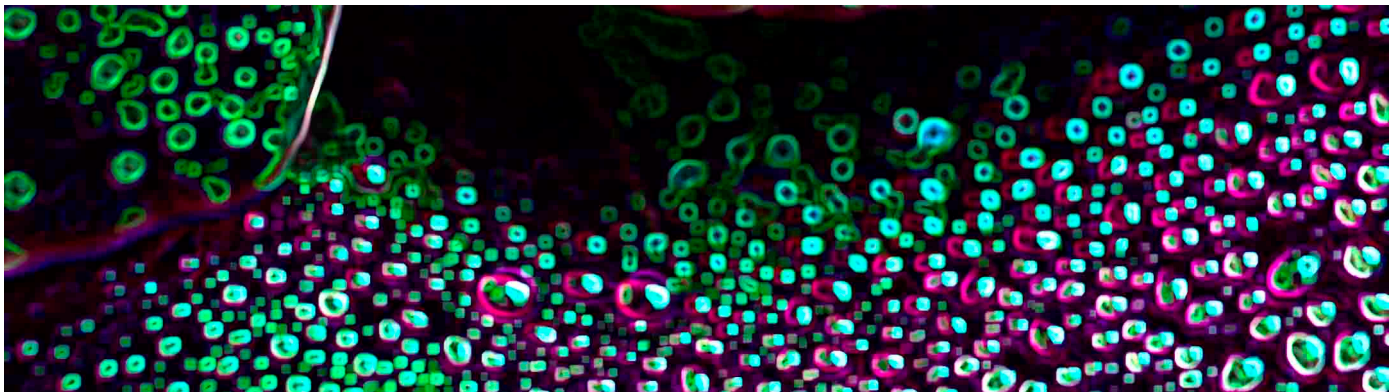

**P.S.**

**I put the link on an article just published in the journal «Soins infirmiers» («Health Nursing»), February 2011, on odors in hospitals and aromatherapy: «A touch of well-being in turmoil»**
